achieve	The Committee experienced turn over in membership with the regignetion of Stove Meede	
•	The Committee experienced turn-over in membership with the resignation of Steve Meads and the appointment of new member, Nanishka Abaladejo and anticipates further changes in the next year. This has the advantage of adding new expertise to the Committee, but requires frequent review of issues to bring new members up-to-date.	
•	The development of Chatham Park within the Pittsboro extra-territorial jurisdiction, but not subject to jurisdiction by Chatham County, may cause adverse environmental impacts in the County. While the Committee will continue to monitor the development, its ability to make meaningful recommendations to prevent adverse environmental impacts in the County may be inhibited.	
	RECOMMENDED CHANGES: Please list any recommendations to the Board of Commissioners related to the hanges in the advisory committee's membership, mission, goals, objectives or other related issues.	
interes • The Ef	ommittee wishes to continue its monitoring activities of the following issues of environmental t to Chatham County: The activities of the NC Mining and Energy Commission regarding hydraulic fracturing. The development of Chatham Park. The performance of solar-powered aerators to control algae in Jordan Lake RC met with the chair and a member of the Agriculture Advisory Committee to hear their concerns Chatham Park's broad impacts on the County. The Committee recognizes the importance of wate	
supply examp loss of	and waste water management to the development and environment of Chatham County. For le, it has been claimed that the housing developments within former agricultural areas cause the groundwater supplies for agricultural uses. It is recommended that water supply and waste wate ement considerations be included in any future developments plans.
