					Lab Cost	Cost *1.33	Std Fee

- Notes:
1. Value ranges for the adjusted fees are based on September 2024 residential building value data
  2. Value ranges should be compared to online GIS Tax and Land Information viewer data to determine adjusted sample fees
  3. The adjusted fee calculations are highlighted in yellow at the bottom of each column (Fees are rounded to the nearest \$5)
  4. Some fees adjusted outside of equation due to inconsistent lab costs (Using the equation resulted in a cost higher than the std fee.)
  5. Spreadsheet does not include waived fees (doctors notes, special well sampling projects, etc. )
