

Body Scanner request for Sole Source.

Name	Tek84	Command Sourcing	STVS
Size WxD	72x34	101.8x77	71x40
Cost	\$142,500.00	\$139,315.56	\$132,500.00

Above are 3 prices and dimensions of different body scanners. All 3 have the same functions and abilities. The decision for a specific device would rely on size, customer service, and customer satisfaction/use.

Size:

The only location available for the body scanner is limited by depth. We have a space of 35 inches deep. Anything larger than 35 inches would block a door and in turn would be a violation of the fire code. The above-listed machines are the smallest and most capable for our needs on the market. Tek84 is the only machine that fits our requirements.

Customer Service:

All three companies are knowledgeable about the functionality of their machines. Tek84 by far has the fastest response time and follow up when I asked questions or needed information.

Customer Satisfaction/Use:

Tek84 is in 24 of 100 NC Counties which is the most used body scanner in NC detention facilities. All the agencies that I have spoken with speak highly of Margo and the Tek84 company. The other 2 companies were not able to provide the same map documentation of availability as Tek84. Those companies either do not have scanners in NC yet or serve very few locations.
