

Chatham County Agricultural Preservation

Associate Director of Land Protection West,
Margaret Sands
Good Ground Manager,
Kierra Hyman

Preserving working lands for the future

8 public nature preserves (starting with White Pines) and OVER 25,000 acres conserved in the Triangle.

TLC strives to create a healthier and more vibrant Triangle region by safeguarding clean water, protecting natural habitats, supporting local farms and food, and connecting people with nature through land protection and stewardship, catalyzing community action, and collaboration.

Supporting Local Farms and Food

- TLC works with willing landowners to acquire conservation easements on working farms and forests
 - Voluntary legal agreement that limits uses inconsistent with agricultural production and conservation values
 - Landowners **still own** the land and can use, sell or pass land on to heirs
 - Conservation easements do **not** allow public access
- TLC typically acquires conservation easements using some combination of federal, state, and local dollars plus landowner donation (a “bargain sale”)
- TLC staff monitor conservation easements annually to ensure they are followed and continue landowner relationships

Conservation Easement Benefits

Benefits to Community

- Conservation easements preserve working lands for open space, food security, and communities' livelihoods
- Prime soils are protected for future agricultural use
- Properties with conservation easements have a reduced value, so it's easier for farmers to start or expand operations
- Agricultural lands generate more money than they use-more protected farms means more net providers of tax dollars
- Farms and forests provide flood resilience and wildlife habitat in addition to food and fiber

Chatham Comprehensive Plan

“Preserving rural character was identified as the most important goal during the planning process. Rural character means different things to different people. For some, it is clean water, forests, and wildlife. For others, it is scenic beauty for a lifestyle that includes privacy peace and quite. For many, it is simply the ability to farm.”

-Chatham Comprehensive Plan

2nd fastest growing county in the state at the time of the plan. An 85% population increase in 25 years.

Strategy 1.1

Assist operators of existing farms that are contributing to the economy to remain in operation even when faced with pressures to develop the land for other uses.

Partner with land trusts to provide technical assistance to those who demonstrate interest in establishing agricultural conservation easements.

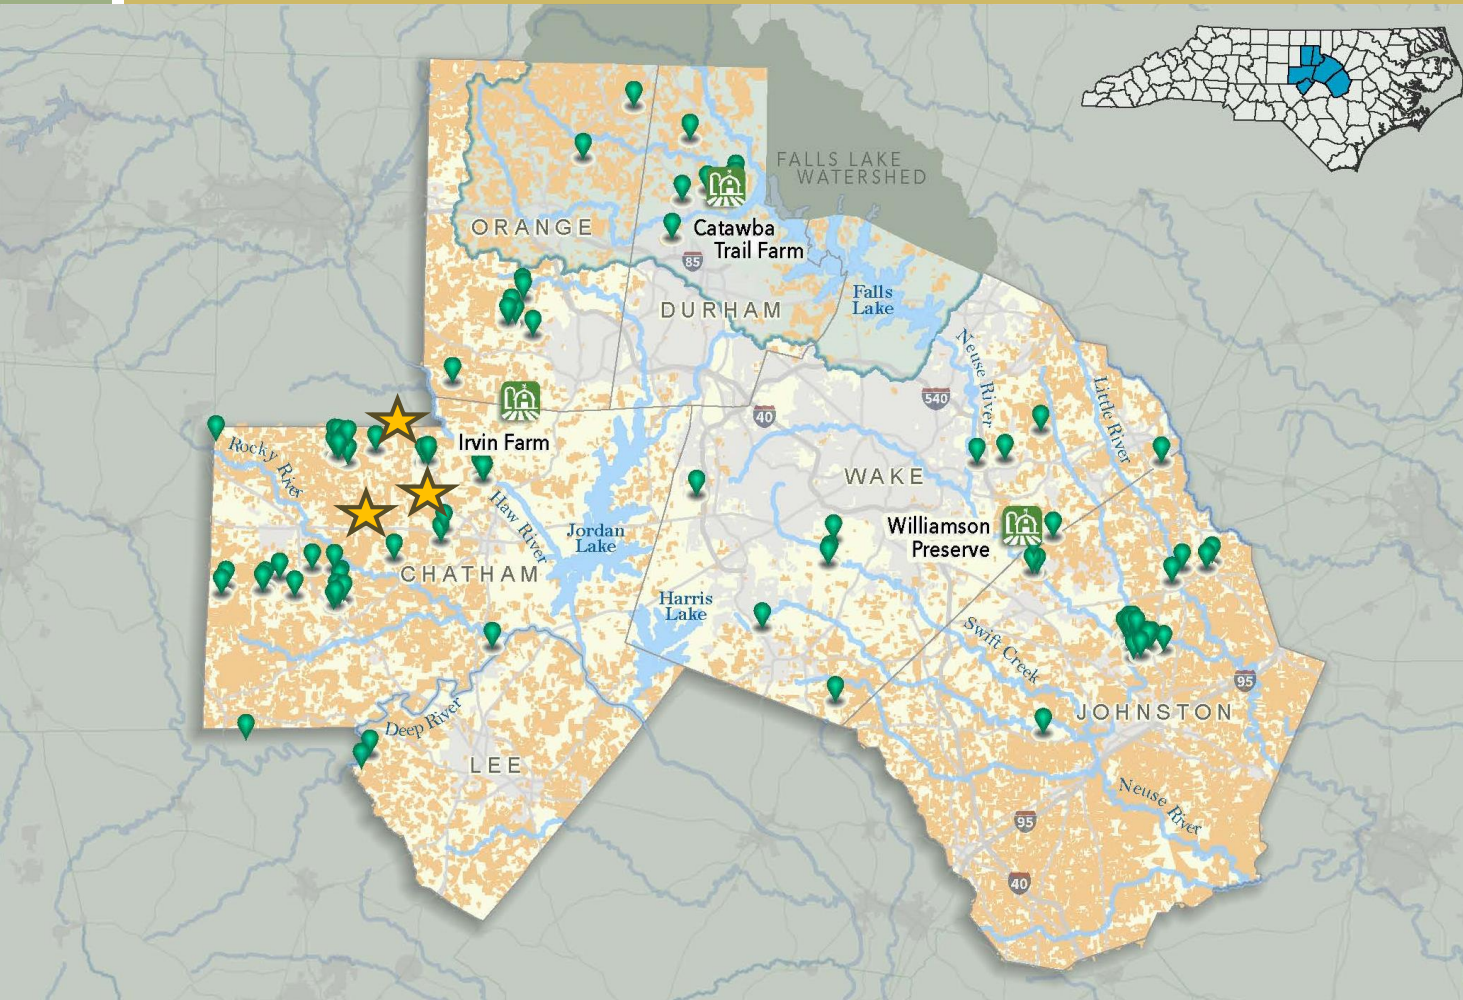

-Chatham Comprehensive Plan

Our Goal: Protect the agricultural community, soil, water resources and economic viability of farmers and farmlands in western Chatham County.

-TLC Chatham Working Lands Initiative

Above: Lindale Farm owners (the Lindley family) used part of the proceeds from their easement sale to fund their organic farm certification on their 5th generation 182 acre property.

TLC Working Lands Conservation

TLC holds
~3,000 acres of
working lands
easements in
Chatham County

~Nearly half the
land in the county
is enrolled in the
Present Use Value
(or Working
Lands Tax Status)
program

Currently seeking
Chatham County
funding for three
projects totaling
287 acres

-  TLC farm preserves
-  TLC agricultural easements
-  Parcels with Working Lands Tax Status

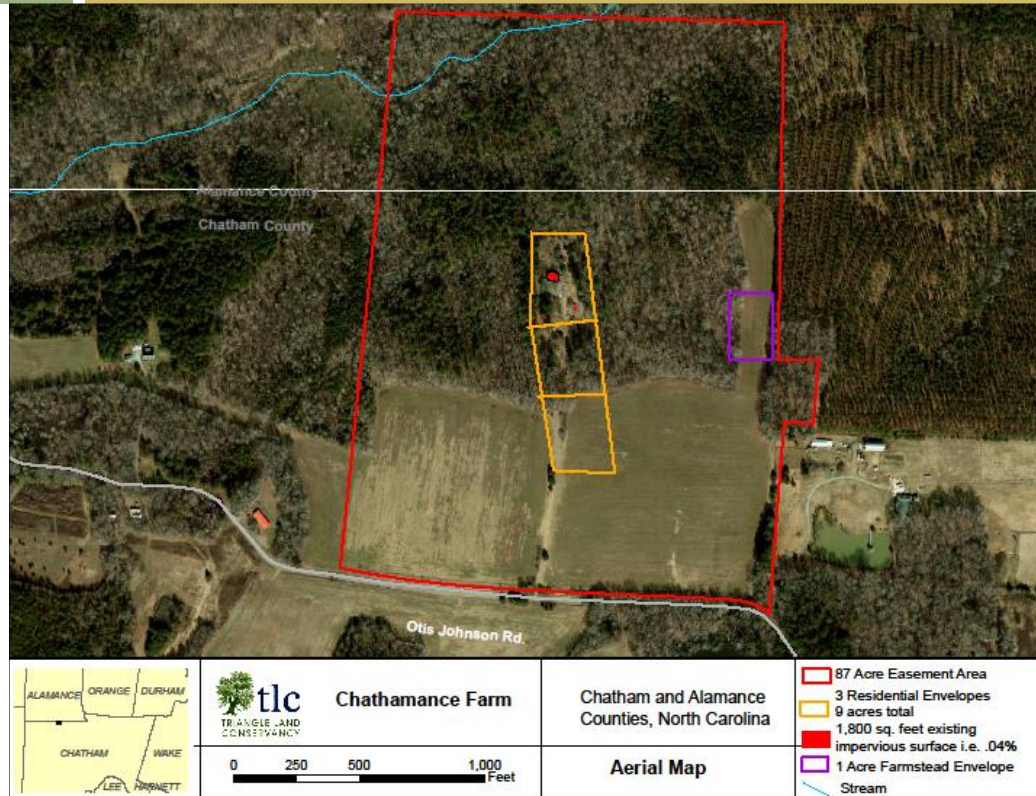

Triangle Working Lands Initiative Benchmark Map

98 agricultural easements held on 8,090 acres

Map created by TLC on 8/9/2023

Chathamance Farm

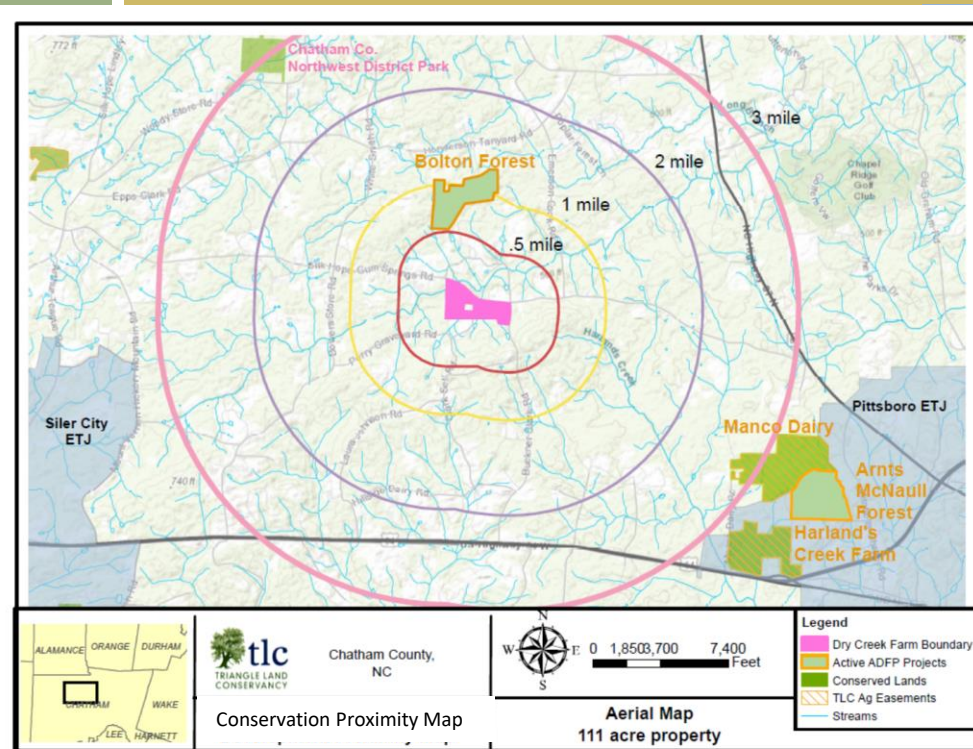

Jerry Johnson, well established Silk Hope family
Forest Stewardship Plan

Neil Lindley harvests certified organic hay

Submitted to NC Agricultural Development and
Farmland Preservation Trust Fund, seeking stewardship funds from Chatham

Dry Creek Farm

Michael Buckner currently manages this multigenerational Silk Hope farm raising beef cattle
80 acre proposed conservation easement

Submitted to NC Agricultural Development and
Farmland Preservation Trust Fund, seeking matching funds from Chatham County

Granite Springs Farm

Meredith Leight runs a well established market farm with a large following and stellar reputation

Chatham County, NC Market Farm & CSA
Well fed people can do amazing things!

Locally Grown Vegetables, Microgreens, Ginger, Turmeric, & Mushrooms

16 years of growing vegetables using organic practices on our farm in Chatham County NC.

Well researched regenerative practices with strong educational component

120 acre conservation easement
Mixed forest, habitat, stream and farm property.
Seeking majority of funding from Chatham County

Good Ground Initiative

Rapid loss of
prime farm,
forest, and
recreational
lands

High costs of land

Historic inequities
in land ownership
and retention

Lack of direct
pathways from
education to land
ownership

Triangle Land Conservancy strives to turn organizational resources and power into equitable land distribution by empowering partners and investing resources in education and land access for historically underserved land seekers

Land Access, Conservation, Equity

2,824.4869

Consider Committing Rollback Taxes to the Chatham Agricultural Preservation and Development Trust Fund

- Wake and Johnston Counties have already contributed PUV rollback taxes to conserving working lands
- Lee County votes on this policy tonight!

An aerial photograph of a rural farm area. At the top, a paved road with yellow double lines runs horizontally. Below the road is a large green field. In the center, a semi-transparent white rectangular box contains the text "Thank You!". Below the box, there are several long, narrow garden beds covered with black plastic mulch, some with green plants growing. To the left of the garden beds, there are several small buildings, including a white shed and a brown structure, and a few parked vehicles. The bottom of the image shows more green fields and a small white building.

Thank You!
