Dear Jenny,

Re: Single Supplier of Integrated Suite of Functionality

Spatialest Inc has developed a custom suite of integrated software solutions for the Assessment Industry that together help evaluate, manage, and share property data. Property Portal is a one-stop property data search portal that allows citizens to quickly access data from multiple public records departments using the property appraiser as the central hub. Community is a central data hub that creates a powerful dashboard of information and makes customized searches of county information possible. The Comper solutions help validate or present assessment information, assist with appeal management and improve accessing and disseminating property information. The products can be purchased individually and built upon over time to complete the suite of integrated solutions. Spatialest Inc is the single supplier of this integrated suite of functionality.

Please contact me if you have any questions.

Best Regards,
