Chatham County Commissioners  
12 East Street  
Pittsboro, NC 27312

Dear Commissioners,

On behalf of the citizen volunteers representing Chatham CleanPath, I request that you accept the Request for Proposal for Solar Energy Installations on County Facilities and Lands and proceed to obtain proposals from qualified suppliers as outlined in the RFP. It is our hope that you will proceed with this process in all due haste.

In addition to the RFP, I ask that you submit the required documents to take advantage of the free SolSmart program for identifying those properties in the county that would be best suited for solar energy.

I ask that you pursue solar energy for all existing energy use in the county, where feasible, and require solar energy be included in proposals for all future new construction projects.

Thank you for your consideration of this request.

Sincerely,

Amanda Robertson
